Standard Specification for
UNS N08925, UNS N08031, UNS N08932, UNS N08926, UNS N08354, and UNS R20033 Plate, Sheet, and Strip

1. Scope
1.1 This specification covers alloys UNS N08925,* UNS N08031, UNS N08932, UNS N08926, UNS N08354, and UNS R20033 plate, sheet, and strip in the annealed temper.

1.2 ASTM International has adopted definitions whereby some grades, such as UNS N08904, previously in this specification were recognized as stainless steels, because those grades have iron as the largest element by mass percent. Such grades are under the oversight of ASTM Committee A01 and its subcommittees. The products of N08904 previously covered in this specification are now covered by Specifications A240/A240M and A480/A480M.

1.3 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.4 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to become familiar with all hazards including those identified in the appropriate Material Safety Data Sheet (MSDS) for this product/material as provided by the manufacturer, to establish appropriate safety and health practices, and determine the applicability of regulatory limitations prior to use.

2. Referenced Documents
2.1 ASTM Standards:2
A240/A240M Specification for Chromium and Chromium-Nickel Stainless Steel Plate, Sheet, and Strip for Pressure Vessels and for General Applications
A480/A480M Specification for General Requirements for Flat-Rolled Stainless and Heat-Resisting Steel Plate, Sheet, and Strip
B906 Specification for General Requirements for Flat-Rolled Nickel and Nickel Alloys Plate, Sheet, and Strip
E527 Practice for Numbering Metals and Alloys in the Unified Numbering System (UNS)

3. Terminology
3.1 Definitions of Terms Specific to This Standard:
3.1.1 plate, n—material 3⁄16 in. (4.76 mm) and over in thickness and over 10 in. (254 mm) in width.
3.1.2 sheet, n—material under 3⁄16 in. (4.76 mm) in thickness and 24 in. (609.6 mm) and over in width. Material under 3⁄16 in. (4.75 mm) in thickness and in all widths with No. 4 finish.
3.1.3 strip, n—material under 3⁄16 in. (4.76 mm) in thickness and under 24 in. (609.6 mm) in width.

4. General Requirements
4.1 Material furnished in accordance with this specification shall conform to the applicable requirements of the current edition of Specification B906 unless otherwise provided herein.

5. Ordering Information
5.1 Orders for material under this specification shall include the following information:
5.1.1 Quantity (weight or number of pieces),
5.1.2 Alloy name or UNS number,
5.1.3 Form, plate, sheet or strip,
5.1.4 Dimensions,
5.1.5 Type edge required, for strip only (see Specification B906),
5.1.6 Finish (see Specification B906)—For sheet with No. 4 finish, specify whether one or both sides are to be polished,
5.1.7 ASTM designation,
5.1.8 Additions to the specification or special requirements,
5.1.9 Certification or test reports—State if certification or test reports are required, and
5.1.10 Source inspection—State if inspection is required.

---

* This specification is under the jurisdiction of ASTM Committee B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.07 on Refined Nickel and Cobalt and Their Alloys.

* New designation established in accordance with Practice E527 and SAE J1086, Practice for Numbering Metals and Alloys (UNS).

2 For referenced ASTM standards, visit the ASTM website, www.astm.org, or contact ASTM Customer Service at service@astm.org. For Annual Book of ASTM Standards volume information, refer to the standard’s Document Summary page on the ASTM website.
6. Chemical Composition

6.1 The material shall conform to the composition limits specified in Table 1. One test per lot is required as defined in Specification B906.

6.2 If a product analysis is made by the purchaser, the material shall conform to the product (check) analysis variations in Specification B906.

7. Mechanical Properties and Other Requirements

7.1 Tensile and Hardness Requirements—The material shall conform to the mechanical property requirements specified in Table 2. One test per lot is required as defined in Specification B906.

8. Dimensions and Permissible Variations

8.1 Sheet—The material shall be furnished in accordance with the dimensional requirements established in Specification B906.
